Neoen (ISIN Code: FR0011675362, Ticker: NEOEN, Vigeo ESG Rating 61/100) (the "**Company**"), one of the world's leading and fastest-growing independent producers of exclusively renewable energy, announces today the success of the placing of the first ever European senior unsecured green bonds convertible into new shares and/or exchangeable for existing shares of the Company (OCEANE Verte) due June 2nd, 2025, (the "**Bonds**"), offered to qualified investors only, for a nominal amount of approximately €170 million (the "**Offering**").

Proceeds of the Neoen's green convertible bonds will be allocated to finance or refinance renewable energy production (solar PV, wind power) or storage activities in consistency with EU taxonomy requirements and with the Framework available on Neoen website. It will thus contribute to finance growth towards Neoen's target of having more than 5 GW in capacity in operation or under construction by the end of 2021, while optimizing balance sheet within the guidelines given by the Company regarding an average leverage ratio of approximately 80-85% of invested capital on an all-in basis including all Group debt, whether corporate, junior or senior.

Xavier Barbaro, Chairman and CEO of Neoen, comments: *"The strong success of this first ever green convertible bond in Europe further reinforces Neoen's role as a responsible player in the field of renewable energies and a pioneer in sustainable finance. This green convertible bond issuance has been concluded under very favorable conditions both for Neoen and our shareholders. It has also provided a new opportunity for investors to participate actively alongside us in the global combat against greenhouse gas emissions and climate change."*

Main terms of the Bonds

The Bonds will be issued at par and will bear an interest of 2.0% from the Issue Date, payable semi-annually in arrears on December 2nd and June 2nd of each year (or on the following business day if this date is not a business day), and for the first time on December 2nd, 2020.

The nominal unit value of the Bonds has been set at €46.20, corresponding to a premium of 40% above the reference share price which is set as the clearing price of the concurrent placement (by way of an accelerated bookbuilding process, the "**Concurrent Accelerated Bookbuilding**") of existing shares of the Company organised by the joint global coordinators, to facilitate hedging for certain subscribers of the Bonds. The number of shares sold as part of the Concurrent Accelerated Bookbuilding represented 606,060 shares. The Company and Impala SAS, which holds 49.96% of the share capital and voting rights of the Company, participated in the Concurrent Accelerated Bookbuilding and acquired each 60,606 shares, representing for each of them 10% of the total size of the placement.

Settlement-delivery of the Bonds and of the shares sold in the Concurrent Accelerated Bookbuilding are expected to take place on June 2nd, 2020 (the "**Issue Date**").

Unless previously converted, exchanged, redeemed or purchased and cancelled, the Bonds will be redeemed at par on June 2nd, 2025 (or on the following business day if this date is not a business day) (the "**Maturity Date**").

The Bonds may be redeemed prior to maturity at the option of the Company and at the option of the bondholders under certain conditions.

In particular, the Bonds may be fully redeemed earlier at par plus accrued interest, at the Company's option at any time from June 23rd, 2023 until the Maturity Date, subject to a minimum of 30 (but not more than 90) calendar days prior

notice, if the arithmetic average, calculated over a period of 20 consecutive trading days chosen by the Company from among the 40 consecutive trading days preceding the publication of the early redemption notice, of the products of the volume weighted average price of the Company's shares on the regulated market of Euronext in Paris ("**Euronext Paris**") on each trading day of the considered period and the applicable conversion/exchange ratio on each such trading day exceeds 130% of the nominal value of the Bonds.

Upon a Change of Control of the Company, a Free Float Event or a Delisting of the shares of the Company (as these terms are defined in the terms and conditions of the Bonds), all bondholders will have an option to request the redemption before the Maturity Date of the Bonds at their nominal amount plus accrued but unpaid interests.

Bondholders will be granted a conversion/exchange right of the Bonds into new and/or existing shares of the Company (the "**Conversion/Exchange Right**") which they may exercise at any time from the Issue Date and until the 7th trading day (inclusive) preceding the Maturity Date or the relevant early redemption date.

The conversion/exchange ratio is set at one share per Bond subject to standard adjustments as described in the terms and conditions of the Bonds. Upon exercise of their Conversion/Exchange Right, bondholders will receive at the option of the Company new and/or existing Company's shares carrying in all cases all rights attached to existing shares as from the date of delivery.

Application will be made for the listing of the Bonds on Euronext AccessTM of Euronext in Paris to occur within 30 calendar days from the Issue Date.

Lock-up undertakings

In the context of the Offering, the Company and Impala SAS have respectively agreed to a lock-up undertaking on the issuance or sale of shares or of securities giving access to the share capital for a period starting from the announcement of the transaction and ending 90 calendar days after the Issue Date, subject to certain customary exceptions or waiver from the Joint Global Coordinators.

Dilution

For illustrative purposes, as a result of the Offering and the final conditions, the issue of 3,679,653 Bonds would lead to a maximum dilution of approximately 4.3% of the outstanding share capital, should the Company decide to exclusively deliver new shares upon full exercise of the Conversion/Exchange right of the Bonds.

Any person subsequently offering, selling or recommending the Bonds (a "distributor") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels. For the avoidance of doubt, even if the target market includes French retail investors, the manufacturers have decided that the Bonds will be offered, as part of the initial offering, only to eligible counterparties and professional clients.
